

PMDTec at Frost & Sullivan Excellence in Best Practices Awards Banquet in London

Siegen, Germany, January 14, 2010 -- Frost & Sullivan hosted its prestigious Excellence in Best Practices Awards Banquet on Tuesday, December 8, 2009, in London. PMDTechnologies was honored at the event for its superior performance in developing three-dimensional imaging devices that are low cost, complex and robust.

Dr. Bernd Buxbaum and Dr. Thorsten Ringbeck accepted the award on stage. Dr. Buxbaum said in his acceptance speech: "A third party reference like this from Frost & Sullivan really means a lot to us. It shows us, our shareholders, investors and customers, that we are doing the right things at the right time. For me personally, this is really a great honor and I'm proud to represent the leading 3D-ToF company in the world. So stay

tuned to PMDTec to discover new dimensions in the future."

For the Enabling Technology Award, the following criteria were used to benchmark PMDTechnologies' performance against key competitors: Creation of new technologies and/or products, enhancement of current products, ability to get into new applications, setting the industry standard, market acceptance potential, and delivery of the technology to the market and end-user transition and recognition.

The much anticipated and highly competitive Award recognizes companies in a variety of regional and global markets for demonstrating outstanding achievement and superior performance in areas such as leadership, technological innovation, customer service, and strategic product development. Industry analysts compare market participants and measure performance through in-depth interviews, analysis and extensive secondary research in order to identify best practices in the industry.

About PMDTechnologies GmbH

PMDTechnologies, a fabless integrated circuit manufacturer, is the worldwide leading 3D CMOS-based digital imaging supplier. The company was founded in 2002 as a spin-off from the Center for Sensor Systems at the University of Siegen. PMDTechnologies GmbH owns about 40 patents worldwide concerning PMD based applications, the PMD principle and its realization. By 2008, the company had sold some 100,000 PMD sensors in various markets and applications. The company is open for collaboration and looks for new application areas through potential partnerships with key players in each relevant application sector. About 50 people are employed by the German based corporation working mainly on the chip design, quality assurance and in the area of pre-series and product development.
